InSight Vision Center

When you need the most comprehensive eye care, InSight Vision Center has it all. They can detect signs of disease or abnormality early, while they're still easy to treat, and give you the most thorough eye exam possible. They diagnose and treat sight-threatening problems like cataracts, glaucoma, macular degeneration and diabetic retinopathy. They explain everything to you clearly and provide the care you need.

InSight provides personal attention to every patient, letting you know that your health care needs are the number one priority. The practice is not so large that patients feel lost in the crowd and still InSight offers the most advanced treatment options ever developed, including LASIK laser vision correction and ReSTOR® Multi-focal lens implants - a breakthrough that can eliminate your need for glasses after cataract surgery.

"You want a doctor who listens to you, who understands your concerns and who always puts your needs first. You want a doctor

you can trust. That's the kind of care you can expect from us," said Eric J. Poulsen, MD, ophthalmologist for InSight.

In addition to their ocular services, their well-trained staff offers eyelid lifts, advanced skin laser resurfacing, laser hair removal, BOTOX®, Restylane®, and much more.

"Patients need compassion from their doctor, and I try to give that every day in my practice," states Larry R. Lawrence, MD, ophthalmologist at InSight.

"I believe people can still go to a private eye doctor who takes the time to listen and understand their needs," said Alan T. Israel, OD, optometrist and contact lens specialist at InSight.

InSight offers appointments during lunch hours, weekends and evenings. They offer financing, honor most insurance plans, and accept Visa & Master Card. For a free LASIK consultation and excellent medical services, call InSight Vision Center today at 559.449.5050 or visit www.InSightVisionCenter.com.
